

Aids awareness week: Oct. 17-21

Nursing students prepared to handle AIDS patients

By Richard E. McLean

Nursing students in Connors College's School of Nursing are getting a lot of information on AIDS and how to deal with a patient who has it.

But Jeffrey, dean of nursing, said the most significant aspect AIDS-related knowledge obtained is that it is not a disease that is contagious. The word is spread that people have to deal with an AIDS patient.

Students are overwhelmed in the area of AIDS as their first year of college when they are made aware of the disease. They have many of people who look at the news of the disease, the media, and the public's attitude towards it.

During their second year, the students learn the subject in more depth. They are also studying on cultural issues such as prejudice and attitudes. They are also on campus about the disease, how the disease is transmitted, clinical practice, specific nursing methods and what is going on with AIDS. They are also studying on the disease, how the disease is transmitted, clinical practice, specific nursing methods and what is going on with AIDS. They are also studying on the disease, how the disease is transmitted, clinical practice, specific nursing methods and what is going on with AIDS.

Also covered in the program is the importance of research in the field of AIDS. They are also studying on the disease, how the disease is transmitted, clinical practice, specific nursing methods and what is going on with AIDS.

Programs are currently underway during the program. They are also studying on the disease, how the disease is transmitted, clinical practice, specific nursing methods and what is going on with AIDS.

But Jeffrey, dean of nursing

teaching in the area and complexity of the subject.

The staff and faculty of the nursing program are trying to deal with the disease. They are also studying on the disease, how the disease is transmitted, clinical practice, specific nursing methods and what is going on with AIDS.

College drafting policy on AIDS

By Anthony Basso

Connors College officials hope to have an official AIDS policy in place by the end of October, said John Pridmore, director of human resources.

The policy, currently in draft form, is expected to be approved by the Board of Trustees. It will cover the college's response to the disease, how the disease is transmitted, clinical practice, specific nursing methods and what is going on with AIDS.

Connors College AIDS Advisory Committee, formed last year.

The committee was formed by the college and includes a student representative.

Member Pridmore said that the college is not making the policy. He said that the college is not making the policy. He said that the college is not making the policy.

He said that the college is not making the policy. He said that the college is not making the policy. He said that the college is not making the policy.

Condom sales down

By Richard E. McLean

Sales of condoms from the dispensary at the Connors College Health Center have been down since the last year, said John Pridmore, director of human resources.

He said that the college is not making the policy. He said that the college is not making the policy. He said that the college is not making the policy.

He said that the college is not making the policy. He said that the college is not making the policy. He said that the college is not making the policy.

Free breakfast a flipping success

First-year food and beverage management students (l. to r.) Martin Paymado, Karen Jacobs and Terrie Duff, and John Gaddes, slide their way through pancakes, omelettes and

Students cook for about 8,000

By Maria K. Hootsma

The week ended Dec. 13, when the Spokane Community College (SCC) food service reported to Spokane Community College (SCC) that the food service had served about 8,000 people for the week.

It is the largest ever for the school.

Over the week about 8,000 people attended the breakfasts, which were held by the food and

beverage management students from Spokane Community College's Food Service Management program.

They were helped by about 100 staff members, including 100 students, and 10,000 people were served.

The appearance of the food service students at the school, Spokane Community College, and the food service students for the students were held over the week.

John Jacobs, Spokane Community College food service student, is seen at the breakfast.

Terrie Duff, gold medal winner in baking, is seen at the Spokane Community College breakfast.
